Subject Index of Volume 39

Alkali metal cations
electrostatic investigation of motion of, through polyacetylene, 311
Alkylene–aromatic polymers
magnetic property measurement of simple, 103
Amino acid
chiral metals; amino acid-substituted conducting polypyrroles, 117
Anion effect
spectroelectrochemical study of, on transient redox behaviour of poly(*N*-methylpyrrole) in anhydrous acetonitrile, 61
Anion exchange processes
in polypyrrole, XPS studies of proton modification and some, 69

BEDT-TTF
influence of growth conditions on superconducting T_c of κ-(BEDT-TTF)$_2$Cu(NCS)$_2$ crystals, 261
preparation and properties of new organic conductor (BEDT-TTF)$_4$Cu(C$_2$O$_4$)$_2$, 355
(BEDT-TTF) iodide
superconducting thin films of, 191
Bipolaron
formation on isolated model thiophene oligomers in solution, polaron and, 125
Bismuth
structure and electrical transport properties of misfit-layer compound (BiS)$_{1.08}$TaS$_2$, 1

Carbon fibres
Pd electrodeposition on electrochemically oxidized, and electrocatalytic activity of modified electrodes, 303
Charge-carrier transport
conductivity of organic composites with 3- and 2-dimensional crystalline networks, 25
Charge transport properties
of cofacially joined [GaPcF(BF$_4$)$_x$]$_n$ macrocycles, 343

Chiral metals
amino acid-substituted conducting polypyrroles, 117
Conducting phase
continuity of; conductivity of organic composites with 3- and 2-dimensional crystalline networks, 25
Conducting polymers
containing metal–nitrogen=nitrogen monomeric linkages, new class of, 183
electronic structures of polyyne derivatives with S addition; design of new, 225
Conductivity
and electron density of undoped model compounds of poly(phenylene vinylene), 137
evolution of *in situ*, of polythiophene deposits by potential cycling, 183
of organic composites with 3- and 2-dimensional crystalline networks
charge-carrier transport, 25
continuity of conducting phase, 13
pressure moulding of graphite and polyacetylene in 1,4-*trans*-polybutadiene and activation of, via I complexation, 133
Copper
electron transfer between binuclear, and TCNQ units; magnetic and electrical properties, 81
influence of growth conditions on superconducting T_c of κ-(BEDT-TTF)$_2$Cu(NCS)$_2$ crystals, 261
preparation and properties of new organic conductor (BEDT-TTF)$_4$Cu(C$_2$O$_4$)$_2$, 355
Counter-anion exchange
effect of, on electrical conductivity of polypyrrole films, 43
CPMAS NMR study
^{15}N, of structure and reactions of polypyrrylenemethine and polyfurylene-pyrrylenemethine, 319

Elsevier Sequoia/Printed in The Netherlands

Density
of state variation in polypyrrole as function of pressure up to 1.5 GPa, 233
Diamines
electrodeposition of cationic radical salts of some aromatic, from acetonitrile solution, 327
Dielectric properties
of electrochemically prepared poly(*N*-methylpyrrole); effect of supporting electrolytes, 215
Doping
formation of new structure of I-doped poly(2,5-thienylene) and reversible doping and undoping behaviour of poly(2,5-thienylene) studied by X-ray diffractometry, 269
in situ IR study of electrochemical doping–undoping process of poly(1-naphthol) film, 109

Electrical conductivity
of polypyrrole films, effect of counteranion exchange on, 43
of various poly(3-alkylthiophenes), stability studies and, 153
Electrical properties
electron transfer between binuclear Cu and TCNQ units; magnetic and, 81
of hexamethylenetetratellurafulvalene crystals and their pressure dependence, 385
Electrical transport properties
of misfit-layer compound $(BiS)_{1.08}TaS_2$, structure and, 1
Electrocatalytic activity
Pd electrodeposition on electrochemically oxidized C fibres and, of modified electrodes, 303
Electrochemical doping–undoping process
of poly(1-naphthol) film, *in situ* IR study of, 109
Electrochemical sensors
application of zero-current potentiometry in chemical synthesis and characterization of polypyrrole using, 359
Electrodeposition
of cationic radical salts of some aromatic diamines from acetonitrile solution, 327
Pd, on electrochemically oxidized C fibres and electrocatalytic activity of modified electrodes, 303
Electrodes
Pd electrodeposition on electrochemically oxidized C fibres and electrocatalytic activity of modified, 303
Electrolytes
dielectric properties, vibrational and ESR spectra of electrochemically prepared poly(*N*-methylpyrrole); effect of supporting, 215
Electron density
of undoped model compounds of poly(phenylene vinylene), conductivity and, 137
Electron transfer
between binuclear Cu and TCNQ units; magnetic and electrical properties, 81
Electronic properties
of polyparacyclophane, 379
Electronic structure(s)
of polyacetylene, analysis of, based on its optical absorption spectra, 367
of poly(carbon disulfide) and poly(carbon diselenide), 281
of polyyne derivatives with S addition; design of new conducting polymers, 225
Electrostatic investigation
of motion of alkali metal cations through polyacetylene, 311
Ellipsometry
asymmetry between mechanism of oxidation and reduction of poly(3-methylthiophene) studied by, 97
ESR spectra
dielectric properties, vibrational and, of electrochemically prepared poly(*N*-methylpyrrole); effect of supporting electrolytes, 215

Fluorine
charge transport properties of cofacially joined $[GaPcF(BF_4)_x]_n$ macrocycles, 343

Gallium
charge transport properties of cofacially joined $[GaPcF(BF_4)_x]_n$ macrocycles, 343
Graphite
pressure moulding of, and polyacetylene in 1,4-*trans*-polybutadiene and activation of conductivity via I complexation, 133

Growth conditions
influence of, on superconducting T_c of κ-(BEDT-TTF)$_2$Cu(NCS)$_2$ crystals, 261

Hexamethylenetetratellurafulvalene
crystals, electrical and optical properties of, and their pressure dependence, 385

Infrared study
of electrochemical doping–undoping process of poly(1-naphthol) film, *in situ*, 109
of $FeCl_3$-doped polyphenylacetylene; solvent effect, 291
Iodine
formation of new structure of I-doped poly(2,5-thienylene) and reversible doping and undoping behaviour of poly(2,5-thienylene) studied by X-ray diffractometry, 269
pressure moulding of graphite and polyacetylene in 1,4-*trans*-polybutadiene and activation of conductivity via I complexation, 133
Iron
XPS and IR investigations of $FeCl_3$-doped polyphenylacetylene; solvent effect, 291
Isatin derivatives
new; synthesis and reactions, 195

Macrocycles
charge transport properties of cofacially joined [GaPcF(BF$_4$)$_x$]$_n$, 343
Magnetic properties
electron transfer between binuclear Cu and TCNQ units; and electrical, 81
Magnetic property measurement
of simple alkylene–aromatic polymers, 103
Metal
polyazometals; new class of conducting polymers containing metal–nitrogen=nitrogen monomeric linkages, 177
Misfit-layer compound
structure and electrical transport properties of, $(BiS)_{1.08}TaS_2$, 1

Nitrogen
polyazometals; new class of conducting polymers containing metal–nitrogen=nitrogen monomeric linkages, 177
NMR study
^{15}N CPMAS, of structure and reactions of polypyrrylenemethine and polyfurylenepyrrylenemethine, 319

Oligothiophenes
stoichiometric control of successive generation of radical cation and dication of extended α-conjugated; quantitative model for doped polythiophene, 243
Optical absorption spectra
analysis of electronic structure of polyacetylene based on its, 367
Optical properties
of hexamethylenetetratellurafulvalene crystals and their pressure dependence, 385
Organic composites
conductivity of, with 3- and 2-dimensional crystalline networks
charge carrier transport, 25
continuity of conducting phase, 13
Organic conductor
preparation and properties of new, (BEDT-TTF)$_4$Cu(C$_2$O$_4$)$_2$, 355
Oxidation
asymmetry between mechanism of, and reduction of poly(3-methylthiophene) studied by ellipsometry, 97

Palladium
electrodeposition on electrochemically oxidized C fibres and electrocatalytic activity of modified electrodes, 303
Pernigraniline
charged solitons in, 205
Phthalocyanine
charge transport properties of cofacially joined [GaPcF(BF$_4$)$_x$]$_n$ macrocycles, 343
Polaron
and bipolaron formation on isolated model thiophene oligomers in solution, 125
Polyacetylene
electronic structure of, analysis of, based on its optical absorption spectra, 367
electrostatic investigation of motion of alkali metal cations through, 311
pressure moulding of graphite and, in 1,4-*trans*-polybutadiene and activation of conductivity via I complexation, 133

Poly(3-alkylthiophenes)
stability studies of electrical conductivity of various, 153
Polyaniline films
rectifying effect of soluble, 91
Polyazometals
new class of conducting polymers containing metal–nitrogen=nitrogen monomeric linkages, 177
1,4-*trans*-Polybutadiene
pressure moulding of graphite and polyacetylene in, and activation of conductivity via I complexation, 133
Poly(carbon diselenide)
electronic structure of, 281
Poly(carbon disulfide)
electronic structure of, 281
Polyfurylenepyrrylenemethine
^{15}N CPMAS NMR study of structure and reactions of, 319
Poly(α-methylheptyl isocyanide) films
weakly conducting, 121
Poly(*N*-methylpyrrole)
dielectric properties, vibrational and ESR spectra of electrochemically prepared; effect of supporting electrolytes, 215
spectroelectrochemical study of anion effect on transient redox behaviour of, in anhydrous acetonitrile, 61
Poly(3-methylthiophene)
asymmetry between mechanism of oxidation and reduction of, studied by ellipsometry, 97
Poly(1-naphthol) film
in situ IR study of electrochemical doping–undoping process of, 109
Polyparacyclophane
electronic properties of, 379
Polyphenylacetylene
XPS and IR investigations of $FeCl_3$-doped; solvent effect, 291
Poly(phenylene vinylene)
conductivity and electron density of undoped model compounds of, 137
Polypyrrole(s)
application of zero-current potentiometry in chemical synthesis and characterization of, using electrochemical sensors, 359
chiral metals; amino acid-substituted conducting, 117
density of state variation in, as function of pressure up to 1.5 GPa, 233
from β-substituted pyrrole monomers, 275
XPS studies of proton modification and some anion exchange processes in, 69
Polypyrrole films
effect of counter-anion exchange on electrical conductivity of, 43
Polypyrrylenemethine
^{15}N CPMAS NMR study of structure and reactions of, 319
Poly(2,5-thienylene)
formation of new structure of I-doped, and reversible doping and undoping behaviour of, studied by X-ray diffractometry, 269
Polythiophene(s)
evolution of *in situ* conductivity of, deposits by potential cycling, 183
towards highly oriented, incorporating mesogenic or tetrathiafulvalene substituents, 397
stoichiometric control of successive generation of radical cation and dication of extended α-conjugated oligothiophenes; quantitative model for doped, 243
Polyyne derivatives
electronic structures of, with S addition; design of new conducting polymers, 225
Potential cycling
evolution of *in situ* conductivity of polythiophene deposits by, 183
Pressure
density of state variation in polypyrrole as function of, up to 1.5 GPa, 233
electrical and optical properties of hexamethylenetetratellurafulvalene crystals and their, dependence, 385
Pressure moulding
of graphite and polyacetylene in 1,4-*trans*-polybutadiene and activation of conductivity via I complexation, 133
Properties
of new organic conductor (BEDT-TTF)$_4$Cu(C_2O_4)$_2$, preparation and, 355
Proton modification
XPS studies of, and some anion exchange processes in polypyrrole, 69
Pyrrole monomers
polypyrrole from β-substituted, 275

Radical salts
electrodeposition of cationic, of some aromatic diamines from acetonitrile solution, 327
Rectifying effect
of soluble polyaniline films, 91
Redox behaviour
spectroelectrochemical study of anion effect on transient, of poly(*N*-methylpyrrole) in anhydrous acetonitrile, 61
Reduction
asymmetry between mechanism of oxidation and, of poly(3-methylthiophene) studied by ellipsometry, 97

Solitons
in pernigraniline, charged, 205
Solvent effect
XPS and IR investigations of $FeCl_3$-doped polyphenylacetylene, 291
Spectroelectrochemical study
of anion effect on transient redox behaviour of poly(*N*-methylpyrrole) in anhydrous acetonitrile, 61
Stability studies
of electrical conductivity of various poly(3-alkylthiophenes), 153
State variation
density of, in polypyrrole as function of pressure up to 1.5 GPa, 233
Stoichiometric control
of successive generation of radical cation and dication of extended α-conjugated oligothiophenes; quantitative model for doped polythiophene, 243
Structure
and electrical transport properties of misfit-layer compound $(BiS)_{1.08}TaS_2$, 1
and reactions of polypyrrylenemethine and polyfurylenepyrrylenemethine, ^{15}N CPMAS NMR study, 319
Sulfur
electronic structures of polyyne derivatives with S addition; design of new conducting polymers, 225
Superconducting T_c
influence of growth conditions on, of κ-$(BEDT\text{-}TTF)_2Cu(NCS)_2$ crystals, 261
Synthesis
new isatin derivatives; and reactions, 195
of polypyrrole using electrochemical sensors, application of zero-current potentiometry in chemical, and characterization, 359

Tantalum
structure and electrical transport properties of misfit-layer compound $(BiS)_{1.08}TaS_2$, 1
TCNQ
electron transfer between binuclear and TCNQ units; magnetic and electrical properties, 81
Tetrathiafulvalene substituents
towards highly oriented polythiophenes incorporating mesogenic or, 397
Thiophene oligomers
polaron and bipolaron formation on isolated model, in solution, 125

Vibrational spectra
of electrochemically prepared poly(*N*-methylpyrrole); effect of supporting electrolytes, 215

XPS study
of $FeCl_3$-doped polyphenylacetylene; solvent effect, 291
of proton modification and some anion exchange processes in polypyrrole, 69
X-ray diffractometry
formation of new structure of I-doped poly(2,5-thienylene) and reversible doping and undoping behaviour of poly(2,5-thienylene) studied by, 269

Zero-current potentiometry
application of, in chemical synthesis and characterization of polypyrrole using electrochemical sensors, 359
